

Service Program

Briarcliff Generator Service, Inc. (BGS) is factory trained and certified on all types of Generac generators. We have Generac certified factory trained technicians ready to trouble shoot, repair and perform regular maintenance checkups to keep your home power system operating at peak performance.

Generators require periodic preventive maintenance to ensure long term, trouble-free operation. Early detection can help you identify small problems before they become major repair costs.

Generators are an electrical generating device. It is exceedingly more complicated than any other home appliance you have. A commitment to maintenance must be made to ensure reliability and peace of mind knowing it will start when the power goes out.

Are you sure that your generator will start and transfer right now if a power outage were to occur? We eliminate that false sense of security you may have.

BGS will also perform an initial system start-up for generators installed by other contractors not having proper credentials. Having an initial start-up performed by one of our experienced technicians ensures proper installation of the genset. Our technicians verify correct gas supply pressure, as well as transfer to generator power and re-transfer to utility power. A complete system functionality test is also performed.

Our maintenance plans provides the required maintenance for your standby Generac generator system for a full year. Our maintenance plan includes two inspections per year following the Guardian factory service schedule 4.13. Our experience service technicians verify complete system testing during each inspection which includes system load test to verify complete system functionality during each inspection

INITIAL START-UP

Air Cooled - \$250.00

Liquid Cooled - \$350.00

MAINTENANCE PLAN

Liquid Cooled H-Panel - \$550.00

Air Cooled Plan – 1 year \$650.25

Air Cooled Plan – 2 year \$1,083.75

Liquid Cooled Plan – 1 year \$812.82

Liquid Cooled Plan – 2 year \$1,408.88

Liquid Cooled H-Panel – 1 year \$1,050.00

Liquid Cooled H-Panel – 2 year \$1,900.00
